Closed top tank (CTT) refers to a type of tank or vessel that has a solid, closed top rather than an open top. CTTs are typically used for storing liquids or gases, and they may be made from a variety of materials, such as steel, plastic, or fiberglass. They are often used in industries such as chemical processing, food and beverage production, pharmaceuticals, and oil and gas. The closed top design helps to prevent contamination and evaporation of the stored material, as well as ensuring that the contents remain secure and contained.
