According to our (Global Info Research) latest study, the global Cloth Wallpaper market size was valued at US\$ 507 million in 2025 and is forecast to a readjusted size of US\$ 687 million by 2032 with a CAGR of 4.5% during review period.

Cloth wallpaper consists of a textile base with a paper backing. Instead of directly attaching the cloth to the wall, the paper-backed cloth is applied. This type of wallpaper is also known as 'woven wallpaper,' 'cloth,' or 'textile.'

Various materials, including cotton, linen, pulp, rayon, silk, and satin, are used in cloth wallpaper. Depending on the weave and processing method, it comes in different styles such as plain weave, twill weave, vermillion weave, non-woven, and planted wallpaper.

Compared to more common vinyl cloth wallpaper, cloth wallpaper offers a simpler, more luxurious look with humidity regulation benefits. It is durable and doesn't easily tear, reducing the risk of sick building syndrome. However, it is more expensive than vinyl, offers fewer design options, is less fireproof, and can be challenging to clean.

Cloth wallpaper is popular in various building types, including residential homes, both for new construction and renovation. Made from natural materials like cotton and linen, it enhances air permeability and humidity control, creating comfortable environments even in summer.
