Cloud-Based License Plate Recognition (LPR) Services refer to software platforms that use cloud computing infrastructure to process, analyze, and store vehicle license plate data captured by cameras in real time. Instead of relying on local servers or on-premise hardware, these systems transmit image or video data to remote cloud servers where artificial intelligence (AI) and optical character recognition (OCR) algorithms automatically detect, read, and convert license plate numbers into searchable digital records. Enterprise annual contracts: Often scale with number of devices, analytics modules, and API access, and can run thousands to tens of thousands USD per year for larger deployments.
