Abstracts

The global Cloud-Based LIMS (Laboratory Information Management System) market size is expected to reach \$ 826 million by 2030, rising at a market growth of 7.5% CAGR during the forecast period (2024-2030).

A cloud-based LIMS is a laboratory information management system hosted in the cloud and accessible through the Internet. It is a convenient software that allows users to access multiple systems from any location with access to the Internet.

Like an on-premise LIMS system, cloud-based LIMS enable laboratories to manage and streamline their processes and data. However, what sets this system apart is that it is managed by a third party in a secure location. This eliminates the need to set up local servers or invest in data storage infrastructure.

This report studies the global Cloud-Based LIMS (Laboratory Information Management System) demand, key companies, and key regions.
