Cloud-based video conferencing or video conferencing-as-a-service (VCaaS) allows two or more locations to communicate by simultaneous two-sided audio and video transmissions. In cloud solutions, cloud server is used to transfer, access, and storage data. Video conferencing is different from videophone calls as the former is designed to process multiple locations rather than individuals. VCaaS provides organizations the benefits of high-quality HD video conferencing technology without any major investment in hardware, infrastructure, and network.
