The global Cloud Cost Management and Optimization Tools market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Cloud cost management, or cloud spend management, is defined as the concept of effectively managing your cloud expenses to minimize cost and maximize the returns on investment. The process involves tracking, measuring, and regulating cloud spending to find the most cost-effective strategies. It entails cloud cost control for components like memory, storage, network traffic, instances, and more.

Traditionally, cloud cost management was all about cost-cutting and maximizing returns. But, the modern cloud cost optimization approach has made a shift from mere cost-cutting to the optimization of ideal cloud infrastructure per the cloud requirements. The costs and usage are monitored to forecast the needs and the cloud infrastructure.
