According to our (Global Info Research) latest study, the global Cloud Hardware Security Modules (HSM) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

New programming developments have made it possible for cloud providers to offer the benefits of having an HSM without the associated costs of owning and managing the module itself. With HSM as a Service, the cloud provider makes it possible for users to generate their own encryption keys and set access protocols for their data. While the cloud provider manages access to the HSM, the cryptographic keys themselves remain under the exclusive control of its customers.
