According to our (Global Info Research) latest study, the global Cloud Infrastructure and Management Software market size was valued at US\$ 14828 million in 2025 and is forecast to a readjusted size of US\$ 21310 million by 2032 with a CAGR of 5.4% during review period.

Cloud infrastructure and management software refers to the software system used to build, run, configure, monitor, and optimize cloud computing infrastructure resources. It encompasses the virtualization and scheduling capabilities of underlying resources such as computing, storage, and networking, as well as management platform software for unified management, orchestration, automated operation and maintenance, cost optimization, and security control of multi-cloud, hybrid cloud, or single-cloud environments. Its core objective is to achieve efficient utilization, elastic scaling, automated operation and maintenance, and unified governance across environments for cloud resources. It is a key supporting software system connecting underlying hardware resources and upper-layer application services in modern cloud computing architectures.

With enterprise digital transformation, the explosive growth in AI computing power demand, and the widespread adoption of multi-cloud and hybrid cloud architectures, cloud infrastructure and management software is evolving from traditional IT operation and maintenance tools into the 'control center' of enterprise digital infrastructure. Especially against the backdrop of rapid expansion in large-scale model training, high-performance computing (HPC), and globally distributed data centers, the demand for resource scheduling efficiency, cost optimization capabilities, and unified cross-cloud management has significantly increased. Simultaneously, new IT operation models

such as DevOps, AIOps, and FinOps are further driving the evolution of this type of software towards intelligence, automation, and platformization, making it one of the most stable and sticky core software layers in the cloud computing industry chain.
