## Abstracts

The cloud RAN is also known as centralized RAN; the mobile network infrastructure that supports 2G, 3G, and 4G system and the benchmarks of the wireless communication use an advanced cellular network architecture which is nothing but cloud RAN. The cloud RAN is far better than the traditional cellular network system as it avoids the usage of radio frequency equipment, the baseband unit, antenna, and digital processor. The cloud RAN helps the cellular network operators in delivering effective and qualitative mobile communication services in a cost effective way and also enhances the mobile communications.
