The global CNC Grinder Numerical Control System market size is expected to reach \$ 1051 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

In 2025, global CNC Grinder Numerical Control System production reached 154,000 units, with an average selling price of US\$4,681 per unit. The CNC Grinder Numerical Control System is a motion control and process software platform specifically designed for various CNC grinding equipment (surface grinders, external/internal grinders, centerless grinders, tool grinders, gear grinders, etc.). It consists of a CNC controller (interpolation/look-ahead/acceleration/deceleration), PLC logic, servo drive/motor, spindle and grinding wheel axis control, feedback system (encoder/grating), HMI, I/O, and industrial network. It also integrates grinding-specific functions (such as grinding wheel dressing/tool setting, grinding cycle, constant surface speed/constant power, online measurement and compensation, thermal drift/geometric error compensation, collision/interference monitoring, etc.) to convert program and process parameters into high-precision, multi-axis collaborative grinding trajectories and process control. The end-user applications of the entire machine cover the automotive and new energy (motor shafts/gears, rolling bearings, fuel injection system components, etc.), aerospace and gas turbines, precision molds and cutting tools, medical devices, semiconductor and optical related parts, and other fields. The upstream of the industry chain includes industrial computing platforms and motion control chips/boards, servo drives and drives, encoders, grinding wheel spindles and frequency converters, electrical and safety systems, sensing and online measurement (probes/diameter gauges/temperature sensors), industrial networks and software libraries; the midstream consists of CNC system manufacturers; and the downstream consists of CNC grinding machine manufacturers. Gross profit margins range from approximately 40% to 65%. This report studies the global CNC Grinder Numerical Control System production,

demand, key manufacturers, and key regions.
