A CNC Oscillating Knife Cutter is a computer numerical control (CNC) machine equipped with an oscillating knife blade that rapidly moves up and down (oscillates) to cut through various materials. Unlike traditional rotary cutting tools, the oscillating knife uses a vertical motion to slice through materials, making it particularly effective for cutting flexible, soft, or semi-rigid materials that might be difficult to handle with standard rotary cutters. CNC Oscillating Knife Cutter are widely used in industries that require precise cutting of various materials.
