## Abstracts

The global CNC Rotary Table market size is expected to reach \$ 41310 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

A rotary table is a precision work positioning device used in metalworking. It enables the operator to drill or cut work at exact intervals around a fixed (usually horizontal or vertical) axis. Some rotary tables allow the use of index plates for indexing operations, and some can also be fitted with dividing plates that enable regular work positioning at divisions for which indexing plates are not available. A rotary fixture used in this fashion is more appropriately called a dividing head (indexing head).

The key players of CNC Rotary Table include GSA Technology, Tanshing Accurate Industrial, Parkson Wu Industrial, TJR Precision Technology, and Detron Machine. The top five manufacturers hold approximately 51% of the global market share, with GSA Technology being the largest manufacturer with approximately 14% of the market share.

In terms of product types, Single Axis is the largest segment, with a share of 71%. From the perspective of product application, Vertical occupy an important position, with a share of 58%, followed by Horizontal with a share of nearly 30%.

This report studies the global CNC Rotary Table production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for CNC Rotary Table and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and
