According to our (Global Info Research) latest study, the global CNC Tap and Thread Grinder market size was valued at US\$ 303 million in 2024 and is forecast to a readjusted size of USD 411 million by 2031 with a CAGR of 4.5% during review period.

CNC tap and thread grinder is a high-precision device used for machining and trimming thread tools, especially taps and thread cutters. It precisely controls the grinding process through the CNC system, and can efficiently and accurately machine various types of threads, including internal and external threads, pitches, thread angles, etc. CNC tap and thread grinders usually use multi-axis CNC technology, which can achieve multi-directional linkage to meet the processing needs of complex thread shapes. Compared with traditional thread grinders, CNC versions have higher processing accuracy, automation and production efficiency, which can greatly improve production efficiency, reduce manual intervention, and adapt to more complex production tasks.
