SCOPE OF THE REPORT:

This report focuses on the CNG Compressor Aftermarket in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. According to the report, one of the major drivers for this market is growing use of CNG as fuel. The transportation sector alone contributed about 14% of the total GHG emissions across all the sectors in 2014. GHG emissions adversely affect the environment, leading to several health problems. To curb the widespread pollution from vehicles, governments of various countries are taking initiatives to replace gasoline and diesel with CNG in the transportation sector. This is because gasoline and diesel are responsible for harmful emissions. To reduce emissions and meet stringent anti-pollution norms, governments are promoting the use of CNG fuel and NGVs.

The worldwide market for CNG Compressor Aftermarket is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
