Co-Extrusion Wood Plastic Composite (WPC) Flooring is an advanced flooring material that combines the beauty of wood with the durability and low maintenance of plastics. It is manufactured using a co-extrusion process, where two or more materials are extruded simultaneously to create a composite layer. The outer layer is composed of a high-performance plastic, typically PVC, while the inner core consists of a mixture of wood fibers and recycled plastics. This construction provides enhanced strength, resistance to moisture, fading, and staining, making it suitable for both indoor and outdoor applications. Co-Extrusion WPC Flooring offers a wide range of design options, allowing for customizable aesthetics to complement any space.
