## Abstracts

According to our (Global Info Research) latest study, the global Co-rotating Twin-screw Extruder market size was valued at USD 814.5 million in 2023 and is forecast to a readjusted size of USD 1012.6 million by 2030 with a CAGR of 3.2% during review period.

Twin screw extruder is the classic machine used for the plastic extrusion process when two or more ingredients are mixed or compounded. In a Co-rotating Twin-screw Extruder system, the screw transports material around up to the point where the screws intermesh. Because of the two opposing and equal velocity gradients acting at this point, material is taken over by the other screw with the least amount of material passing through the gap between the two screws. This system offers a higher degree of self-cleaning with greater control over residence time distribution.

Global key players of co-rotating twin-screw extruder include Coperion, JSW(SM Platek), Leistritz, Shibaura Machine, Clextral, etc. The top five players hold a share about 45%. Europe is the largest producer, has a share about 28%, followed by China and North America, with share 26% and 17%, respectively.
