## Abstracts

The global Co-rotating Twin-screw Extruder market size is expected to reach \$ 1012.6 million by 2029, rising at a market growth of 3.2% CAGR during the forecast period (2023-2029).

Global key players of co-rotating twin-screw extruder include Coperion, JSW(SM Platek), Leistritz, Shibaura Machine, Clextral, etc. The top five players hold a share about 45%. Europe is the largest producer, has a share about 28%, followed by China and North America, with share 26% and 17%, respectively. The largest market is Asia-Pacific, with a share about 55%, followed by Europe and North America, with share 20% and 17%, separately.

Twin screw extruder is the classic machine used for the plastic extrusion process when two or more ingredients are mixed or compounded. In a Co-rotating Twin-screw Extruder system, the screw transports material around up to the point where the screws intermesh. Because of the two opposing and equal velocity gradients acting at this point, material is taken over by the other screw with the least amount of material passing through the gap between the two screws. This system offers a higher degree of self-cleaning with greater control over residence time distribution.
