Abstracts

The global CO2 Incubators market size is expected to reach \$ 995 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032).

CO2 incubators are designed to copy a cell's natural environment with a relative humidity of around 95 percent, a temperature of 37°C and a pH of 7.2 to 7.5. They are most common in biology labs performing tissue or cell culture and are used in any process where cells need to be cultured for a few hours or many weeks or where cells need to be expanded or maintained.

The CO2 Incubators industry concentration is relatively high, and the production areas are mainly in United States, Europe and China. Thermo Scientific, Eppendorf and Panasonic are the top 3 of CO2 Incubators, with 55% market shares.

Market Drivers

CO2 incubators provide an optimal environment for the growth of cell and tissue cultures. It maintains constant temperature and high humidity through carbon dioxide control. Biological scientists around the world rely on carbon dioxide incubators to stimulate the growth of organic materials such as cells or tissues.

Since the incubator is isolated from the outside environment, it also prevents cell contamination.

This report studies the global CO2 Incubators production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for CO2 Incubators and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
