## Abstracts

The global Coated Carbon Foil market size is expected to reach \$ 2235 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

Coated carbon foil is a functional current collector material in which a thin conductive carbon layer is coated onto the surface of a metal foil, typically aluminum or copper foil, for use in rechargeable batteries. The carbon coating enhances interfacial conductivity between the current collector and active materials, improves adhesion, reduces contact resistance, and suppresses corrosion or side reactions. By optimizing the electrode interface, coated carbon foil significantly improves battery performance in terms of rate capability, cycling stability, and high-temperature reliability, and is widely used in lithium-ion batteries, sodium-ion batteries, and emerging solid-state battery systems. In 2025, global Coated Carbon Foil production reached approximately 122 k tons, with an average global market price of around US\$11267 per ton. The production capacity for Coated Carbon Foil in 2025 was approximately 140 k tons. The typical gross profit margin for Coated Carbon Foil is between 20% and 40%.

The coated carbon foil market refers to the global market for functional current collector materials in which a thin conductive carbon layer is coated onto metal foils, mainly aluminum and copper, for use in rechargeable batteries. This market is driven by the rapid growth of lithium-ion batteries in electric vehicles, energy storage systems, and consumer electronics, where coated carbon foils improve interfacial conductivity, adhesion, and cycling stability. With the emergence of next-generation technologies such as sodium-ion batteries and solid-state batteries, coated carbon foils are increasingly regarded as critical enabling materials, leading to sustained demand growth and continuous technological upgrades in coating processes and carbon material systems.

This report studies the global Coated Carbon Foil production, demand, key manufacturers, and key regions.
