Scope of the Report

This report focuses on the Coating Additives in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Water-borne formulations dominate the market among all the formulation types. With increasing environmental regulations, the market share of coating additives for solvent-borne system is decreasing. The demand is shifting toward the water-borne and powder-based coating additives due to stringent environmental regulations. However, solvent-borne is still being significantly used in Asia-Pacific and South America though its use has drastically reduced in Europe and North America.

Architecture is the major application of coating additives. The growing commercial and residential construction in Asia-Pacific is driving the demand for coating additives for better protection of buildings. In addition, the growing automotive sector in regions such as Asia-Pacific and South America is catalyzing the demand for high-performance coating additives.

The worldwide market for Coating Additives is expected to grow at a CAGR of roughly 6.1% over the next five years, will reach 9060 million US\$ in 2023, from 6350 million US\$ in 2017, according to a new GIR (Global Info Research) study.
