Abstracts

According to our (Global Info Research) latest study, the global Coaxial Agitators market size was valued at USD 32 million in 2023 and is forecast to a readjusted size of USD 46 million by 2030 with a CAGR of 5.4% during review period.

The coaxial agitator is connected by the chain to the sprocket at the upper end of the intermediate shaft on one side of the drive shaft, and the passive gear coaxial with the sprocket engages with the driving gear fixed at the lower end of the drive shaft. The two stirring blades of the utility model rotate in reverse so that a convection can be formed between the two stirring blades of the raw material during the stirring process, thus completely solving the problem that the traditional mixer does not mix the raw material.

Global key players of Coaxial Agitators include EKATO GROUP, UTG Mixing Group, INOXPA and RVT System, etc. Global top four manufacturers hold a share over 50%. Europe is the largest producer of Coaxial Agitators, with a share over 60%, followed by North America.
