The global Cobalt-60 (Co-60) Sealed Sources market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Cobalt-60 (Co-60) sealed sources refer to radioactive sources containing the radioactive isotope cobalt-60 that are encapsulated in a sealed container, often made of stainless steel or other durable materials. These sealed sources are designed for specific applications, primarily in industrial radiography for non-destructive testing (NDT). The sealed design ensures that the radioactive material remains contained and shielded, minimizing the risk of radiation exposure to personnel and the environment.
