Abstracts

There are few cobalt concentrate resources in China, especially independent cobalt deposits, which are mainly produced together with iron, nickel, copper and other minerals as associated minerals. There are 150 known cobalt ore producing areas, distributed in 24 provinces (regions), with Gansu Province having the largest reserves, accounting for about 30% of the total reserves of the country. The total reserve of cobalt in China is 470000 tons. There are four types of ore deposits: magmatic type, hydrothermal type, sedimentary type and weathering crust type.

This report studies the global Cobalt Concentrate production, demand, key manufacturers, and key regions.
