## Abstracts

The global Cocamide Diethanolamine (Cocamide DEA) market size is expected to reach \$ 790 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Coconamide diethanolamine is a non-ionic surfactant which is made from coconut oil fatty acid and reacts with diethanolamine. It has good emulsifying, thickening, foam stabilizing and decontamination properties. It is often used as an auxiliary surfactant in shampoo, shower gel, detergent and various liquid detergent formulations to improve the structure of foam and enhance the system viscosity and formula stability. In 2025, global Cocamide Diethanolamine (Cocamide DEA) production reached approximately 386 K MT, with an average global market price of around US\$ 1,487 per ton.

Against the backdrop of sustained growth in global demand for daily chemical cleaning and personal care products, cocoamide diethanolamine, as a mature and cost-effective functional additive, maintains relatively stable market demand, especially in emerging markets and popular cleaning products, still occupying an important position; However, due to the tightening of environmental regulations and the increasing concern of consumers for safety and sustainability, some regions have put forward restrictions on its use, promoting downstream exploration of low amine or amine free alternatives. However, in the cost sensitive and industrial clean application fields, cocoamide diethanolamine still has irreplaceable market space in the short term, showing an overall trend of stable demand and structural adjustment.

This report studies the global Cocamide Diethanolamine (Cocamide DEA) production, demand, key manufacturers, and key regions.
