Abstracts

The global Coconut Charcoal Briquettes market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Coconut Charcoal Briquettes are compacted or pressed blocks made of shredded mature coconut shells. Other briquettes contain other combustible biomass materials such as sawdust, rice chaff, and other leftover crops. These blocks are bound through the process of pressing and/or binding by using binders such as starch. However, other manufacturers opt to simply use pressure to eliminate additional cost for another resource like binders. Briquettes' are mainly used in grilling and in other modes of cooking.
