Coffee Creamer, also called coffee whitener, or non-dairy creamer, is a cream substitute used primarily for flavoring coffee and tea. There are a variety of creamers made with various products, but most of the standard or best-known brands contain the protein-rich milk derivative casein in the form of sodium caseinate.

In terms of consumption, North America is currently the world's largest consumer market, accounting for 31.3% of the market share.

From the production side, China and Southeast Asia are two important production regions, accounting for 44.5% and 36.7% of the production market share respectively. It is expected that Southeast Asia will maintain the fastest growth rate in the next few years, and the production share is expected to reach 39.3% in 2030.

From the perspective of product market application, the sales share of non-dairy creamer for coffee is about 71.2%, and the CAGR in the next few years is about 2.5%. It is worth noting that due to changes in eating habits, the market for non-dairy creamer for milk tea and cold drinks has grown faster in recent years.
