Abstracts

According to our (Global Info Research) latest study, the global Coffee Grounds Skincare Products market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Environmental protection and sustainability: Coffee grounds are a by-product of the coffee making process. Using them in the production of skin care products can reduce waste generation and achieve resource recycling. This concept of environmental protection and sustainability is becoming more and more popular among consumers.

Antioxidant and skin care effects: Coffee grounds are rich in antioxidants and vitamin B, and have unique effects of moisturizing and brightening the skin. In addition, coffee grounds can promote blood circulation, remove dead skin cells, and reduce dark circles. These skin care effects make coffee grounds skin care products quite competitive in the market.
