Abstracts

The cognitive radio market is segmented on the basis of components into software tools, hardware, and services. The software tools segment is expected to hold the largest market size during the forecast period. Software tools play an important role in the cognitive radio market. Components that are integrated with the hardware of the radio communication systems, such as amplifiers, detectors, and modulators/demodulators, are embedded using the related software tools. Therefore, software tools are an important component of the cognitive radio ecosystem.

Scope of the Report

This report focuses on the Cognitive Radio in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the applications segment, the spectrum sensing application is expected to hold the largest market size during the forecast period. The spectrum sensing application of the cognitive radio involves observing and updating the status of the spectrum and the movement of the licensed or primary users, by periodically sensing the frequency band. Spectrum sensing enables the cognitive radio transceiver to sense any spectrum hole or idle spectrum at a particular time, location, or band. It also identifies the way of accessing the spectrum hole without interfering the communication of the primary users. In the end-users segment, the government and defense segment is expected to have the largest market size during the forecast period. The governments of various countries are focused on developing and implementing advanced communication technologies, such as cognitive radios and Software-Defined Radio (SDR), for serving the requirements of the modern nature of warfare as well as ensuring public safety and security.

The worldwide market for Cognitive Radio is expected to grow at a CAGR of roughly 16.6% over the next five years, will reach 8180 million US\$ in 2023, from 3250 million US\$ in 2017, according to a new GIR (Global Info Research) study.
