According to our (Global Info Research) latest study, the global Coking Coal market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Coking coal, also known as metallurgical coal, is used exclusively as an essential ingredient for steel production.

China dominated the global metallurgical coal market in 2016. Most of the coal mining companies in China are controlled by the government. Falling demand of metallurgical coal since 2012 till 2014 has resulted in the drop in its prices. As a result, in February, 2015, the Government of China implemented a top-down approach to decrease the congestion in the domestic coal mining industry. It ordered its coal mining companies to reduce their annual production by 9% or 500 million metric tons (MMTs), between 2019 and 2022.
