According to our (Global Info Research) latest study, the global Colchicine API market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Colchicine is a natural alkaloid compound found in the plant *Colchicum autumnale*, also known as the autumn crocus or meadow saffron. It has been used for centuries as a medicinal agent, particularly in the treatment of gout and other inflammatory conditions. Colchicine has anti-inflammatory and anti-mitotic properties, which means it interferes with cell division.

Manufacturers and pharmaceutical companies produce colchicine API through a controlled and standardized process to ensure the purity and quality of the active ingredient. Once the colchicine API is obtained, it undergoes further processing and formulation to create the final dosage forms for medical use.
