Cold Applied Polypropylene Tape is a type of tape used in a variety of industrial and construction applications. It is primarily made of polypropylene (PP) plastic and is generally highly durable and tear-resistant. The surface of the polypropylene tape is usually coated with an adhesive layer to facilitate adhesion. The 'cold application' of this tape means that it can be applied at room temperature and does not require heating or special processing. Users can directly apply the tape to the target surface at ambient temperature.
