Scope of the Report:

This report focuses on the Cold Chain Storage in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global cold chain market is primarily driven by increased need to reduce food wastage across the globe. Secondly, the rapid growth of frozen food segment is expected to drive the cold chain equipment market. However, high installation cost coupled with stringent government policies and regulation is expected to hinder the growth of cold chain equipment market. Nonetheless, increased demand for food in emerging countries is likely to open new avenues for cold chain equipment market in near future.

Asia Pacific is expected to be one of the fastest growing regional markets for cold chain equipment market within the forecast period. This market growth is expected to be driven by the increase in the deployment of cold chain management in India and China. Thus, the increased demand for cold chain logistics in emerging economies is one of the major trends that are expected to contribute to the growth of the global cold chain market during the years to come.

The worldwide market for Cold Chain Storage is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
