## Abstracts

According to our (Global Info Research) latest study, the global Cold-coated Fluorine Release Film market size was valued at US\$ 198 million in 2024 and is forecast to a readjusted size of USD 244 million by 2031 with a CAGR of 3.1% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Cold-mount fluorine release film is a fluorine release film that is laminated at room temperature. It is a film material made of polyester film (PET) as the base material, coated with fluoroplastic release agent, and then bonded with silicone pressure-sensitive adhesive. During the laminating process, the fluorine release film does not need to be heated, but the residual heat of the silicone tape is used to closely fit the fluorine release film. Cold-mount fluorine release film is suitable for composite die-cutting and stamping of high-temperature silicone rubber pressure-sensitive tape, as well as laminating processing of various silicone products, such as 3M silicone double-sided tape 9731, 3M9119, 3M4377, etc.
