Abstracts

The global Cold Compression Devices market size is expected to reach \$ 241 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Cold compression therapy combines two elements of the first aid technique, RICE (Rest, Ice, Compression, Elevation); active pneumatic compression with cryotherapy (also referred to as cold therapy). Cold compression therapy works by distributing alternating pressure (this removes edema and reduces swelling which can be eliminated by the lymphatic system). Also, the improved circulation with the intermittent pressure promotes and accelerates tissue healing and tissue quality. Additionally, the decrease in temperature reduces pain by constricting blood flow to the injury.

Global Cold Compression Devices main players are Coolsystems (Game Ready), DJO Global, BREG, ?ssur, ThermoTek, etc. Top five companies hold a share above 65%. North America is the largest market, with a share about 45%.

This report studies the global Cold Compression Devices production, demand, key manufacturers, and key regions.
