## **Abstracts**

According to our (Global Info Research) latest study, the global Cold Compression Devices market size was valued at US\$ 171 million in 2024 and is forecast to a readjusted size of USD 232 million by 2031 with a CAGR of 4.5% during review period.

Cold compression therapy combines two elements of the first aid technique, RICE (Rest, Ice, Compression, Elevation); active pneumatic compression with cryotherapy (also referred to as cold therapy). Cold compression therapy works by distributing alternating pressure (this removes edema and reduces swelling which can be eliminated by the lymphatic system). Also, the improved circulation with the intermittent pressure promotes and accelerates tissue healing and tissue quality. Additionally, the decrease in temperature reduces pain by constricting blood flow to the injury.

Global Cold Compression Devices main players are Coolsystems (Game Ready), DJO Global, BREG, ?ssur, ThermoTek, etc. Top five companies hold a share above 65%. North America is the largest market, with a share about 45%.
