Cold drawn steel bar is also known as cold finish steel bar. It is typically manufacture as turned bar or cold drawn bar. It is skilled by pulling bar through die which is portable than the arrive hot rolled size. It is produced with either hot rolled steel bar or rod as raw material through various process that starts with shot-blasting to remove scale and rust that is intrinsic in hot rolled products and would decline the surface finish of the bar if allowed to remain. Next the raw material is cold drawn through a tungsten carbide die, where its cross section is reduced and formed into the expected shape. At the initial stage, the bar is straightened and polished before it is covered with rust protective oil and then it packed for storage and delivery. Due to its increased precision and strength properties, this process is used to create a range of automotive parts, machined parts, and a variety of other precision applications.

In North America market, the key players of Cold Drawn Bar include Nucor, Ryerson Holding. The top 3 companies hold a share over 80%. United States is the largest market, with a share over 70%, followed by Mexico and Canada with the share about 15% and 10%. In terms of product, Round type is the largest segment, with a share over 60%. And in terms of application, the largest application is Automobile, with a share about 30%.

Steel prices are greatly affected by fluctuations in global iron ore and scrap steel prices. Unstable raw material prices will affect the production costs and market prices of cold-drawn steel bars. With the continuous improvement of production technology, the

quality and performance of cold-drawn steel rods have been significantly improved, especially through the introduction of digital control and precision processing technology, production capacity and product consistency have also been enhanced. More and more steel production companies are turning to more environmentally friendly production methods. For example, low-carbon technology, scrap steel recycling, energy efficiency improvements, etc., these factors will shape the competitive landscape of the cold drawn steel bar market in the future.
