## Abstracts

Cold mix asphalt is made of a quarter-inch chip and proprietary oil, which keeps the asphalt soft and helps to repel water. Because of the specialty mix, this repair solution does not require any heating. Ready-to-use cold asphalt is usually used for repairing damages to the asphalt pavement. It exhibits increased elastic properties, excellent adhesion to the substrate without requiring a bonding layer and great resistance to weather stressing and time.

This report studies the global Cold Mix Asphalt production, demand, key manufacturers, and key regions.
