Abstracts

Cryotherapy means cold therapy. Cold therapy can be applied in different ways. That can include ice packs, coolant sprays, ice massage, whirlpools, and ice baths. When used to treat injuries at home, cold therapy refers to therapy with ice or gel packs that are usually kept in the freezer until needed. These are one of the simplest, time-tested remedies for managing pain and swelling. It works by reducing blood flow to a particular area, which can significantly reduce inflammation and swelling that causes pain, especially around a joint or a tendon. It can temporarily reduce nerve activity, which can also relieve pain.

According to our (Global Info Research) latest study, the global Cold Pain Therapy OTC Products market size was valued at US\$ 1353 million in 2023 and is forecast to a readjusted size of USD 1901 million by 2030 with a CAGR of 4.9% during review period.

Cold pain therapy plays a major role in managing the pain caused due to musculoskeletal disorder or sports related injuries. Thus, a rise in the number of sports-related injuries is anticipated to fuel the demand for cold pain therapy products that boost the growth of the cold pain therapy market size. For instance, according to data published by the National Safety Council in 2022 following a record low number of sports and recreational injuries reported in 2020, injuries increased 20% in 2021 and now have increased another 12% in 2022. In 2022, 3.6 million people were treated in emergency departments for injuries involving sports and recreational equipment. The activities most frequently associated with injuries are exercise, cycling, and basketball. Thus, the rise in the number of sports injuries is expected to contribute significantly in the cold pain therapy market growth.

This report is a detailed and comprehensive analysis for global Cold Pain Therapy OTC Products market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2024, are provided.

Key Features:

Global Cold Pain Therapy OTC Products market size and forecasts, in consumption value (\$ Million), 2019-2030

Global Cold Pain Therapy OTC Products market size and forecasts by region and country, in consumption value (\$ Million), 2019-2030

Global Cold Pain Therapy OTC Products market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2019-2030

Global Cold Pain Therapy OTC Products market shares of main players, in revenue (\$ Million), 2019-2024

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Cold Pain Therapy OTC Products

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Cold Pain Therapy OTC Products market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Romsons Group, Hisamitsu Pharmaceutical Co.,Inc, Sanofi, ThermoTek Inc, 3M Company, Bruder Healthcare Company LLC, Beiersdorf AG, ?ssur, Medline Industries, LP, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Cold Pain Therapy OTC Products market is split by Type and by Application. For the period 2019-2030, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
