Cold Pascalization Equipment, also known as High Pressure Processing (HPP) equipment, is used in food and beverage industries to preserve products by applying extremely high pressure (up to 600 MPa) without the use of heat. This non-thermal method inactivates harmful microorganisms and enzymes while maintaining the food's original taste, texture, and nutritional value. It's widely used for products like juices, ready-to-eat meals, meats, and seafood to extend shelf life and ensure safety without chemical preservatives.
