According to our (Global Info Research) latest study, the global Cold Recyclers market size was valued at US\$ 760 million in 2024 and is forecast to a readjusted size of USD 997 million by 2031 with a CAGR of 4.0% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The cold recycler uses the milling and mixing rotor to mill asphalt pavements, granulates them, sprays binder and water in precisely measured doses, and mixes it all together in a single operation. Cold recycling equipment is used for the in-situ recycling of pavement layers. It is an environmentally friendly paving method providing considerable cost savings over traditional methods. Currently, the typical models of Road Cold Recycling Machines include WIRTGEN 's WR series cold recyclers, Bomag 's RS series Recyclers & stabilizers and XCMG's XLZ series Cold Recycler, etc.

Road cold recyclers offer an efficient and sustainable solution for road repair and reconstruction. They are increasingly utilized in road construction and maintenance projects due to their ability to recycle existing materials and reduce the need for new raw materials.

Asia-Pacific dominates the market owing to initiatives by the government, ongoing projects, and increased investment in the region.
