Collapsible aircraft auxiliary fuel tank is a specialized type of fuel storage unit designed for use in aircraft. As the name suggests, this type of fuel tank is collapsible, meaning it can be folded or compressed when not in use, which can help to save space and reduce the overall weight of the aircraft. These tanks are typically used as additional or auxiliary fuel storage to extend the range or flight duration of an aircraft. They are often made from lightweight, durable materials that can withstand the extreme conditions of flight, including changes in pressure and temperature.
