Collar band cutting machine is a kind of equipment specially used for cutting ties. The motor drives the blade to rotate at high speed to cut the tie. The sharpness of the blade and the cutting speed determine the effect and efficiency of the cutting. During the cutting process, the collar band needs to be fixed in a specific position to ensure the precision and accuracy of the cutting. The tie is cut using the high energy of the laser beam. Laser cutting has the advantages of high precision, high speed and non-contact, and can achieve the cutting of complex shapes. The accuracy of laser cutting can usually reach the millimeter level, which can meet the needs of various collar band designs.
