Abstracts

According to our (Global Info Research) latest study, the global Colocation Services market size was valued at USD 52710 million in 2023 and is forecast to a readjusted size of USD 64850 million by 2030 with a CAGR of 3.0% during review period.

A Colocation center (or colo) offers dedicated facility, where a business can physically house their servers and other equipment. Businesses can rent the space, as opposed to locating their servers or other computing hardware in their offices, for greater network reliability and uptime.

Some of the key players that offer data center colocation services are Equinix Inc., Digital Realty Trust, NTT Communications, Centurylink, Inc., Telehouse, Interxion and AT & T , etc. Among the largest providers, Equinix is the market leader in the combined wholesale and retail colocation market, with 9% of global annualized wholesale and retail colocation revenue. Digital Realty, primarily a wholesale provider, is the second largest supplier in terms of revenue at 5%.

In aggregate the top twelve colocation providers are accounted for almost 30% of the total worldwide market. There is then a long tail of smaller providers, each with 1% or less market share. Even though the market is going through consolidation, the colocation industry has contained over 1,000 additional companies.

Less than half of the world's total revenue for colocation (space supporting IT equipment) is in North America at 40%. The second largest region in terms of colocation operational square feet is Asia-Pacific, with 35% of market.

The Global Info Research report includes an overview of the development of the
