Abstracts

Steel composites are conventional metal-matrix composites in which steel is combined with other metals, ceramic materials, or polymers. Steel composites are more susceptible to corrosion, which could lead to high maintenance cost. Scope of the Report:

This report focuses on the Color Coated Steel Composite in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Color-coated composites are widely used due to their corrosion-resistance and superior strength & lightweight attributes. Thus, color-coated steel composites combine the strength of steel along with corrosion resistance and durability. Furthermore, these are resistant to fire, and provide cooling in summer while warmth in winter.

The worldwide market for Color Coated Steel Composite is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
