Abstracts

The global Color Steel Fence market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Color steel plate refers to a processed plate with a thickness of about 50~100mm. It is composed of filler in the middle and color steel plates on both sides. Among them, the thickness of the color plate has different thicknesses such as 0.4mm, 0.5mm, 0.6mm, etc., and the middle layer can be polyurethane, rock wool or foam plastic, etc. Due to the special profiles, factory buildings built with color steel plates are fast to build, but their strength is low.
