The global Combined Distribution Fire Extinguishing System market size is expected to reach \$ 8375.9 million by 2029, rising at a market growth of 4.4% CAGR during the forecast period (2023-2029).

A Combined Distribution Fire Extinguishing System (CDFES) is a type of fire suppression system that combines different types of extinguishing agents to provide a more comprehensive approach to fire protection. CDFES typically consists of a network of pipes and nozzles that are strategically placed throughout the protected area, such as in data centers, control rooms, and other critical facilities. The system is designed to automatically detect and suppress fires using a combination of water, foam, gas, or powder-based agents.
