The global Commercial Destratification Fan market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Commercial destratification fan, often referred to as a destratification fan or destratifier, is a specialized type of fan used in commercial and industrial settings to improve indoor air circulation and temperature distribution. The primary purpose of these fans is to reduce temperature stratification or temperature differences within large and high-ceilinged spaces. Temperature stratification occurs when warm air rises and accumulates near the ceiling while cooler air remains near the floor, creating uneven temperature zones.
