According to our (Global Info Research) latest study, the global Commercial Drones market size was valued at USD 2637.3 million in 2023 and is forecast to a readjusted size of USD 12100 million by 2030 with a CAGR of 24.3% during review period.

An unmanned aerial vehicle (UAV), commonly known as a drone, is an aircraft without a human pilot aboard. UAVs are a component of an unmanned aircraft system (UAS); which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers.

The growing adoption of smartphones, rising demand for aerial services, and increased demand for drone services from various sectors would supplement the growth of commercial drone market. Leading players are aiming to explore new technologies and applications to meet the growing demands of customers. Collaborations and acquisitions would enable them to enhance their product portfolios and expand into different geographies. Emerging economies would provide opportunity for growth and expansion. Vendors are developing specialized solutions for small and medium-sized businesses to meet their specific business requirements.
