Abstracts

Luminaire is able to provide a light source apparatus and converts electrical energy into electromagnetic radiation, including LED, LFL, CFL, HID, Halogen and Incandescent Luminaire, etc. And it can be used for residential, office, shop, and hospitality, industrial, outdoor and so on.

Scope of the Report:

This report focuses on the Commercial Luminaire in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
For industry structure analysis, the luminaire industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top ten producers account for about 56% of the revenue market.
LED technology will totally change the production and consumption structure of luminaires. In 2011, the market share of luminaire used LED technology or LED light source accounted for about 8% of the total consumption market share, but the figure rose up to 30% by the end of 2015. And it is forecasted that the market share of LED technology in luminaire market will be 45% by the end of 2020. And the increasing penetration rate of LED luminaire is the direct and most important reason for the increasing of industry revenue over the past five years.
The worldwide market for Commercial Luminaire is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US$ in 2023, from xx million US$ in 2017, according to a new GIR (Global Info Research) study.
