Abstracts

The global Commercial Pet Care Managment Software market size is expected to reach \$ 245 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Commercial pet care management software is an integrated digital operation platform designed specifically for commercial pet service agencies such as pet beauty salons, pet boarding centers, pet training institutions, pet daycare centers, and pet shops. The Commercial Pet Care Managment Software industry has gross margins between approximately 60% and 75%.

The commercial pet care management software market has seen continuous growth in recent years, primarily driven by the increasing global pet population, the trend of pets becoming family members, and the rising demand for digital pet ownership. More and more pet owners are prioritizing pet health management, vaccination and deworming reminders, online consultations, feeding records, and daily care, leading to a rapid increase in demand for digital pet management tools. The widespread adoption of mobile internet and the development of telemedicine have also driven the online transformation of pet consultations, appointments, grooming, boarding, and insurance services, increasing user frequency and platform stickiness. Meanwhile, younger pet owners are more inclined to use apps and smart devices for pet health monitoring, activity tracking, and data-driven management, promoting deep integration between smart collars, automatic feeders, and IoT devices and pet care software. The digital upgrades of pet hospitals, chain grooming salons, and pet service platforms are further driving the rapid adoption of SaaS and cloud-based pet care management systems. The development of AI-powered diagnostics, health prediction, behavioral analysis, and personalized recommendation technologies continues to propel commercial pet care

management software towards intelligence, integration, and ecosystem platform development.

This report studies the global Commercial Pet Care Management Software demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Commercial Pet Care Management Software, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Commercial Pet Care Management Software that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Commercial Pet Care Management Software total market, 2021-2032, (USD Million)

Global Commercial Pet Care Management Software total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Commercial Pet Care Management Software total market, key domestic companies, and share, (USD Million)

Global Commercial Pet Care Management Software revenue by player, revenue and market share 2021-2026, (USD Million)

Global Commercial Pet Care Management Software total market by Type, CAGR, 2021-2032, (USD Million)

Global Commercial Pet Care Management Software total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Commercial Pet Care Management Software market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include DaySmart Pet, Gingr, Precise Petcare, Pawfinity, Easy Busy Pets, Revelation Pets, PawLoyalty, Time To Pet, Pet Sitter Plus, MoeGo, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Commercial Pet Care Management Software market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
